

Racks for earthquake proof battery installation

passoni
alpha

This modular rack system is based on the components of the standard rack system.

By using of some additional components, such as stands, braces, telescopes and end holders it is possible to build a seismic rack.

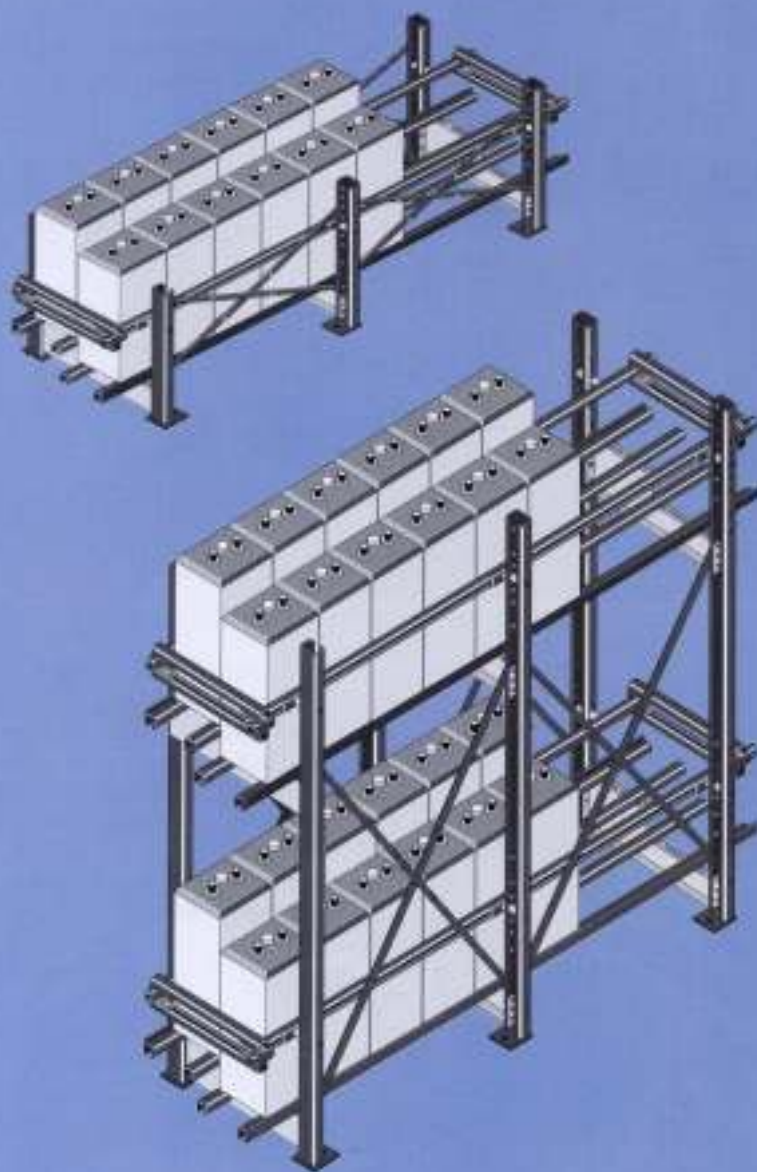

Dependence on the battery size and at corresponding choice of the rack components, rack can be created with an earthquake safety according to the customer demands. The complete range of the usual earthquake loads plus the demanded security factors can be covered.
