

Standard racks for stationary batteries

passoni alpha

These racks have been designed for all types of stationary battery models. In designing these easy-to-use racks, all main requirements, such as, strength, flexibility, acid-proof protection have been considered. These racks are light, small and easy to move and store.

Furthermore, these racks are available at anytime because they are always in stock. These racks can be totally disassembled and assembled by using screws and plates. The main part consist of stringers and support.

The stringers are electrolyte protected and electrical insulated with black polyethylene.

The supports are totally coated with white epoxy powder.
